8TH DISTRICT LOCAL NOTICE TO MARINERS GULF OF MEXICO

MONTHLY EDITION

Econfina River, FL to the Rio Grande, TX LIGHT LIST VOLUME IV NOTICE NUMBER 14/00

April 4, 2000

The Local Notice to Mariners Monthly Edition is published once a month. Weekly supplemental editions are published in intervening weeks. Weekly supplement editions contain chart corrections and light list corrections that will not be repeated in the monthly edition. The monthly edition should be maintained as a reference. Recurring information will be published only once a month.

SECTION I	SPECIAL NOTICES
2000	The 2000 Edition of the Special Notice to Mariners is available on the Internet at the following address:
	HTTP:// <u>WWW.NAVCEN.USCG.MIL/LNM/D8GM</u> . The Special Notice contains general information of interest to the mariner including Coast Guard
	telephone directories, special drawbridge regulations, emergency procedures, boating safety, environmental protection information, aids to navigation,
	communications information, etc.
LIGHT LIST REFERENCE	All bearings referring to lights are given in degrees true from 000° to 359° as observed from a vessel toward the light. Header changes are shown
VOL IV 1999 EDITION	preceding corresponding light list entry. (COMDTPUB P16502.4)
	Searches are conducted for missing and destroyed structures. Those structures, which are not found, are presumed to be in the immediate vicinity.
STRUCTURES	REBUILT/REMAINS or REBUILT/RECOVERED indicates the status of the previously destroyed structure. Mariners should proceed with caution.

NAUTICAL CHARTS AND MISCELLANEOUS MAPS, DATED APRIL 1, 2000

DATES OF LATEST EDITIONS, The dates of latest editions, Nautical Charts and Miscellaneous Maps, dated April 1, 2000, published by the National Ocean Service, is available for issue. It may be obtained free from the Distribution Division, N/ACC3, National Ocean Service, 6501 Lafayette Avenue, Riverdale, MD 20737-1199. This is a quarterly publication listing the most recent editions of nautical charts, miscellaneous maps and publications relating to navigation, weather, etc., with brief descriptions and up-to-date prices for most of the publications listed.

* CAUTION - CLOSE APPROACH TO MOORED OFFSHORE AIDS TO NAVIGATION

Courses should invariably be set to pass these aids with sufficient clearance to avoid the possibility of collision from any cause. Errors of observation. current and wind effects, other vessels in the vicinity, and defects in steering gear may be, and have been, the cause of actual collisions, or the jeopardizing of navigation services provided by these important aids to navigation. Experience shows that buoys cannot be safely used as leading marks to be passed close aboard, and should always be left broad off the course, whenever sea room permits.

When approaching an offshore light structure, large navigational buoy, or station on a submarine site, on radio bearings, insuring that the radio bearing does not remain constant will lessen the risk of collision.

It should be borne in mind that most large buoys are anchored to a very long scope of chain and, as a result, the radius of their swinging circle is considerable. The charted position is the approximate location. Furthermore, under certain conditions of wind and current, they are subject to sudden and unexpected sheers, which are certain to hazard a vessel attempting to pass, close aboard.

* DANGER FROM SUBMARINE CABLES AND PIPELINES

Submarine cables or pipelines pass beneath various navigable waterways throughout the Eighth Coast Guard District. Installation of new submarine cables and pipelines may be reported in the Local Notice to Mariners; their locations may or may not be charted. Where feasible, warning signs are often erected to warn the mariners of their existence.

In view of the serious consequences resulting from damage to submarine cables and pipelines, vessel operators should take special care when anchoring, fishing or engaging in underwater operations near areas where these cables or pipelines may exist or have been reported to exist.

Certain cables carry high voltages; many pipelines carry petroleum products or natural gas under high pressure. Electrocution, fire or explosion with injury or loss of life or a serious pollution incident could occur if they are penetrated.

Vessels fouling a submarine cable or pipeline should attempt to clear without undue strain.

Anchors or gear that cannot be cleared should be slipped; no attempt should be made to cut a cable or pipeline.

* REPORTING OF HAZARDS TO **NAVIGATION**

Mariners occasionally discover shoals, sunken derelict vessels or miscellaneous debris, which could endanger other navigators. Upon discovery of such potential hazards to navigation, mariners should immediately report them to the nearest Coast Guard unit, Defense Mapping Agency and the U.S. Army Corps of Engineers providing as much of the following information as possible:

- Description of the obstruction
- Location in latitude and longitude (Reference chart used)
- Depth of water over obstruction if submerged
- Reporting vessel and observer
 - Time and date observation made

* INLAND OBSTRUCTIONS IN **CANALS AND BAYOUS**

in addition to numerous bayous and natural canals, thousands of man-made canals have been dredged in the wetlands of the Eighth Coast Guard District. While the original purpose of these canals was for private access to pipelines, well locations, or for other mineral related activities, some are being used by boaters. These canals and bayous contain numerous obstructions including barriers, pipes, piles, construction debris, etc. Some of these structures are permanently maintained and have been suitably marked or lighted by their owners. Many others appear and disappear without notice and are uncharted, unlighted, and unmarked. Even on marked structures, because of vandalism, etc. mariners cannot rely on the markings always being maintained in good condition. Therefore, all persons using canals and bayous must anticipate the hazards posed by these obstructions and navigate with extreme caution, especially at night and during periods of reduced visibility.

SECTION II & III DISCREPANCIES AND DISCREPANCIES CORRECTED

To Report (Federal or Private) Aids to Navigation Discrepancies, contact the nearest Coast Guard Group Office. The following listing is for the 24-hour watch stander that is available to take your call.

	Establish Matagorda Bay Alternate Route B 3 (LLNR 35596.1) in approximate position 28-31-19.4N, 96-15-43.4W.
	Establish Matagorda Bay Alternate Route LT 4 (LLNR 35596.2) in approximate position 28-31-22.8N, 96-15-46.2W.
	Establish Matagorda Bay Alternate Route B 5 (LLNR 35596.3) in approximate position 28-29-59.6N, 96-18-12.1W.
	Establish Matagorda Bay Alternate Route LT 6 (LLNR 35596.4) in approximate position 28-30-03.1N, 96-18-13.7W.
	Establish Matagorda Bay Alternate Route B 7 (LLNR 35596.5) in approximate position 28-29-21.4N, 96-20-12.1W
	Establish Matagorda Bay Alternate Route LT 8 (LLNR 35596.6) in approximate position 28-29-25.4N, 96-20-13.2W.
	Establish Matagorda Bay Alternate Route B 9 (LLNR 35596.7) in approximate position 28-28-42.0N, 96-22-01.0W.
	Establish Matagorda Bay Alternate Route LT 10 (LLNR 35596.8) in approximate position 28-28-49.0N, 96-22-09.0W.
	Establish Matagorda Bay Alternate Route B 11 (LLNR 35596.9) in approximate position 28-28-30.7N, 96-22-17.4W.
	Establish Matagorda Bay Alternate Route B 12 (LLNR 35597) in approximate position 28-28-23.7N, 96-22-26.2W.
	Establish Matagorda Bay Alternate Route B 13 (LLNR 35597.1) in approximate position 28-28-04.7N, 96-22-34.9W.
	Establish Matagorda Bay Alternate Route B 14 (LLNR 35597.2) in approximate position 28-28-06.4N, 96-22-38.0W.
	Establish Matagorda Bay Alternate Route B 15 (LLNR 35597.3) in approximate position 28-27-34.7N, 96-22-54.9W.
	Establish Matagorda Bay Alternate Route B 16 (LLNR 35597.4) in approximate position 28-24-36.4N, 96-22-58.0W.
	Establish Matagorda Bay Alternate Route B 17 (LLNR 35597.5) in approximate position 28-27-20.4N, 96-23-04.3W.
	Establish Matagorda Bay Alternate Route B 18 (LLNR 35597.6) in approximate position 28-27-11.0N, 96-23-15.0W.
	Establish Matagorda Bay Alternate Route B 20 (LLNR 35597.7) in approximate position 28-26-59.0N, 96-23-21.2W.
	Relocate Matagorda Bay B 121 (LLNR 36015) from 28-26-45.0N 96-23-19.1W to approximate position 28-26-41.4N, 96-23-27.7W.
	Due to strong currents, these aids to navigation are being established to temporarily mark an alternate channel for the Intercoastal Waterway through Matagorda Bay
	to the north of the existing channel. It will be established to accommodate vessels with no greater than 10 feet draft, due to the presence of several pipelines
	crossing the channel at approximate positions 28-27-31.2N, 96-22-59.2W; 28-27-30.3N, 96-22-59.6W; and 28-27-11.5N, 96-23-10.0W. Mariners should be keenly
	aware of the draft limitations in this alternate channel.
	Charts: 11316 Ref: ANDP-08-00-05D, LNM 12/00

SECTION VI

PROPOSED CHANGES TO AIDS TO NAVIGATION

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. Comments or recommendations for changes to aids to navigation should be addressed to: Commander, Eighth Coast Guard District (oan), ATTN: Projects Branch, 501 Magazine St. Room 1230, New Orleans, LA 70130-3396. All comments submitted should include the following information:

- (A) Quantity, type, capacity, and value of vessels involved and the extent vessels transit the area under consideration seasonally, by day and night.
- (B) Where predictable, the type of navigational devices, such as compasses, radio direction finder, radar, loran, and search lights, with which each vessel are equipped.
- (C) The number of passengers and type, quantity, and value of cargo involved.
- D) Chart section or sketch showing the action proposed when necessary describing the recommended improvement.

BARATARIA AND
BAYOU LAFOURCHE
WATERWAY
Barataria Pass

Comments must be received by April 29, 2000:

Discontinue Bayou Rigaud Range Front Light (LLNR 15995). Discontinue Bayou Rigaud Range Rear Light (LLNR 15400).

Establish Bayou Rigaud Leading Light in approximate position 29-15-59.9N, 89-57-48.4W showing a quick flashing white light visible all around; higher intensity down channel.

Lock Maintenance	Charts: 11367, 11368, 11369 Ref: COE Navigation Bulletin 17-00 NO
LA	All interested parties are notified that the U.S. Coast Guard has received a complaint about an existing, non-permitted, fixed-span pedestrian bridge which has been
LAKE PONTCHARTRAIN	constructed across the Highway 11 Canal, approximately 200 feet from the mouth at Lake Pontchartrain, between U.S. 11 and the Norfolk Southern Railroad near Slidell, St. Tammany Parish, Louisiana. The exact length of time the bridge has existed across the waterway is not known. However, it is believed to have been
HIGHWAY 11 CANAL	constructed in the 1940's. Numerous dwellings exist west of the canal, inhabited by residents who use the bridge as the only available means of land access.
Public Notice for	The Highway 11 Canal, by virtue of being tidally influenced, is considered a navigable waterway and subject to Coast Guard jurisdiction. The Coast Guard is
Solicitation of Views on	presently reviewing this waterway to determine the effect the bridge may have on present navigation. Bridges which cross navigable waterways must meet the
an existing Non-	reasonable needs of existing and projected navigation at the time they are constructed. They also must adequately pass floodwaters and have no impact on the
Permitted Bridge	environment. The Coast Guard will also consider the historical use of the bridge by pedestrians. Comments from waterway users and other interested parties will be included in the decision to determine the appropriate course of action.
	Eighth Coast Guard District Public Notice CGD8-06-00 dated March 8, 2000, contains specific details about the bridge. A copy of the public notice may be obtained
	by writing to Commander (obc), Eighth Coast Guard District, Bridge Administration Branch, 501 Magazine Street, New Orleans, Louisiana 70130, by calling the
	Bridge Administration Branch at (504) 589-2965 or in person at the address given above.
	Interested parties are requested to provide local knowledge as to the sizes and types of vessels which presently transit the Highway 11 Canal at the site of the bridge long which are projected to use the same laborate the bridge in the future. Mariners and other interested parties are also requested to use the same laborate the bridge.
	and which are projected to use the canal above the bridge in the future. Mariners and other interested parties are also requested to express their views, giving sufficient details to establish a clear understanding of reasons for support of or opposition to the existing bridge. Comments should be submitted in writing to the
	Eighth Coast Guard District, Bridge Administration Branch, at the address given in the letterhead through April 14, 2000.

TX GALVESTON BAY ENTRANCE CHANNEL	The Dredge MISSOURI H is operating in the Galveston Harbor and Channel, beginning at the west end of the channel, near Pelican Island Bridge, working easterly to the Houston Ship Channel. The dredge will be working 24 hours a day, 7 days a week and will monitor VHF-FM Channels 16 and 13. Floating and submerged discharge lines extend to confined placement areas on Pelican Island and the east end of Galveston Island (San Jacinto). Mariners are urged to use caution when
Dredging Operations	transiting the area. The POC for COE (Galveston) is Mike Nelson at (409) 766-6328. Charts: 11324, 11323 Ref: COE Navigation Bulletin 00-05 GA, LNM 10/00
TX HOUSTON SHIP CHANNEL	Tug and work barges are currently working in the Houston Ship Channel in the vicinity of Light 65 (LLNR 23155) in connection with the Reef Pad Mitigation Project. Mariners are urged to use extreme caution in this area. The POC for COE (Galveston) is Mike Nelson at (409) 766-6328.
Reef Pad Construction	Charts: 11327 Ref: COE Navigation Bulletin 00-03 GA, LNM 06/00, LNM 09/00
* TX Houston Ship Channel	The Luhr Brothers Co. is placing rock in Galveston bay as part of an oyster mitigation contract. Current work location is approximately 2,000 feet east of Houston Ship Channel Light 60 (LLNR 23125). Both empty and light barges are anchored in the vicinity. The POC for COE (Galveston) is Mike Nelson at (409) 766-6328.
Rock Placement	Charts: 11329 Ref: COE Navigation Bulletin 00-08 GA
TX HOUSTON SHIP CHANNEL Widening Project	The Dredge GEORGE D. WILLIAMS is operating in the Houston Ship Channel, Upper Bay, and will continue downstream. The dredge will be working 24 hours a day, 7 days a week and will monitoring VHF-FM Channels 16 and 13. Discharge lines will extend across the channel to placement areas on the east side of the Houston Ship Channel. Mariners are urged to use caution when transiting the area. The POC for COE (Galveston) is Mike Nelson at (409) 766-6328. Charts: 11329 Ref: COE Navigation Bulletin 00-05 GA, LNM 10/00
* TX HOUSTON SHIP CHANNEL Wave Measurement Study	Commencing approximately April 17, 2000 and continuing until approximately April 22, 2000. A wave measurement study will take place along the Houston Ship Channel, in the vicinity of Peggys Lake, in approximate position 29-44-25.2N 095-03-26.4W. A total of 6 wave gages, mounted on 2-3 inch diameter pipes, will be jetted in approximately 3-7 feet of water, 200 feet outside of the ship channel on the northeast side. The pipes will be marked by reflective tape and lighted with FI Y 2.5 s lanterns. Maritime navigation is expected to maintain speed and proceed through the area of the wave measurement study as they would under normal circumstances. Measurements will be conducted during daylight hours only. The Research Vessel MR GEORGE will be on station and will monitor VHF-FM Channels 13 and 16. Charts: 11329
TX HOUSTON SHIP CHANNEL	The Dredge CALIFORNIA will be operating in the Houston Ship Channel, between Bolivar Roads and the Redfish Reef Area. The dredge will be working 24 hours a day, 7 days a week and will monitoring VHF-FM Channels 16 and 13. Floating and submerged lines extend toward the Bolivar Marsh Placement Area, east of the Houston Ship Channel and north of Bolivar Peninsula. The POC for COE (Galveston) is Mike Nelson at (409) 766-6328.
Widening Project	Charts: 11331 Ref: COE Navigation Bulletin 00-03 GA, LNM 06/00, LNM 09/00
TX HOUSTON SHIP CHANNEL	The Dredge MILLENNIUM will be operating in the Houston Ship Channel, between Lynchburg and Boggy Bayou. The dredge will be working 24 hours a day, 7 days a week and will monitor VHF-FM Channels 16 and 13. Floating and submerged lines extend toward Lost Lake Placement Area. The POC for COE (Galveston) is Mike Nelson at (409) 766-6328.
Widening Project TX	Charts: 11329 Ref: COE Navigation Bulletin 00-03 GA, LNM 06/00, LNM 09/00 Until approximately April 10, 2000, pipeline drilling operations will be conducted in the vicinity of Houston Ship Channel LT 62 (LLNR 23125). The Tugs MISS
HOUSTON SHIP CHANNEL	PAULA and EAGLE will be on station. The operations will continue 24 hours a day, 7 days a week. The tugs will monitor VHF-FM Channels 16 and 13. Mariners are urged to use caution when transiting the area.
